**GETI Enhances eProcessing Network's Gateway Offerings Through  
Checks-By-Web and Check 21+ Certifications**

December 16, 2009 – Destin, Fla. Global eTelecom, Inc. (GETI) announced today that eProcessing Network, LLC (ePN) has completed certification of GETI's Checks-By-Web and Check 21+ solutions geared towards small to mid-sized businesses.

"We recognize the need for merchants to be equipped to accept both check and credit/debit cards from their customer base, so we proactively facilitated certification of GETI's programs to offer Checks-By-Web through our integrated web solutions, including ePNCart, Order Form Generator and PCI-compliant Online Terminal. Completing these certifications is extremely important as it means our reseller channel will now have more flexible and cost-effective payment options to offer their merchants," said Steve Sotis, President of eProcessing Network.

GETI Check 21+ solutions are available through PABP compliant ePNJPOS and ePNPlugIn on the MagTek Excella MDX check reader and dual-sided scanner.

Check processing is still a vital part of the payment industry with 7.2 billion checks authorized in the U.S. in 2008. According to a recent industry survey conducted by the National Automated Clearing House Association, or NACHA, Internet-initiated ACH debits experienced robust growth in 2008, increasing by 19.7 percent, with the number of ACH payments in 2008 topping 18.2 billion.

"The payments industry wants solutions that support all payment types for all possible environments, and ePN delivers," said Chris Brundage, president of GETI. "Expanding our existing relationship with ePN through the addition of these new product lines enhances the offerings for both of our companies' sales channels."
